SOFTWARE PROFICIENCY / TECHNICAL SKILLS

INTRODUCTION

Having both a strong creative background and the technical knowledge needed for print marketing, web design and video production, I have a great understanding of the complete process required to deliver highly successful projects from start to finish.

I know the importance of visual communication and developed a passion for branding, layout, typography, color and other key factors that are applied throughout my work.

I would welcome the chance to apply the skills and knowledge I have gained over the years to your company. I would very much like to discuss the open design position. I look forward to hearing from you soon!

Thank you,
Todd Kammer
